

## **Docent Duane Cline**

From Early childhood, Duane Cline was destined to make his mark in aerospace technology. He graduated from model building to visiting airshows to participating in aviation projects through the Air Explorers program eventually achieving a BS Degree in Aerospace Engineering. He demonstrated his technical knowledge in a widely diverse selection of programs – first Rockwell International (B-1 Bomber) and then at Northrop Aircraft and finally adding windtunnel and advanced systems technology to his impressive list of contributions. Duane joined Scientific Applications and Research Associates management where he was awarded two US patents. Now serving as a docent, Duane is assisting with the Kids Love Aviation Science program.

## **Breaking the Barrier – Women’s History Month**

March Celebrity Lecture was devoted to Women's History Month honoring those women who have made impressive contributions to history. Among CDR Trish Beckman's groundbreaking achievements was her role in opening military aviation opportunities for women to succeed and excel in non-traditional activities.
